

FSD.PT 21 

FSD.PTI21

FSD.PTI21 is a **software application** designed to assist PTI inspectors when **carrying out periodic technical inspections**. It can display specifications, test instructions and other information, and apply testing methods for the electronic vehicle interface via the PTI-Adapter, enabling PTI inspectors to carry out **efficient inspections** of the safety-relevant and environmentally relevant components and systems installed within the vehicle.

Since April 2006, FSD.PTI21 has been used by approximately **15,000 PTI inspectors** in Germany.

VEHICLE COVERAGE

FSD.PTI21 contains information for almost every model, manufacturer and class of vehicle: from **passenger cars, lorries and buses to trailers and motorcycles**. It contains information for **more than 100 million vehicles** in Germany and Europe.

SUPPORTED DEVICES

FSD.PTI21 is touchscreen-compatible and optimised for display on a wide range of devices, including **laptops, tablet PCs and smartphones**.

CONTENT

FSD.PTI21 provides the PTI inspector with all of the **PTI-relevant information** for the vehicle being tested:

TEST PROCEDURES

Specifications and testing methods for assessing the installation, condition, function and efficiency of components and systems, including via the electronic vehicle interface

TEST INSTRUCTIONS

Vehicle type-specific test instructions and defects

STANDARD TYRES

Permitted wheel/tyre combinations

ADDITIONAL INFORMATION

Further information regarding operation and functionality (e.g. instrumentation, on-board computer menus)

LOCATIONAL INFORMATION

Position of the VIN, type plate, OBD socket and engine code where relevant

TECHNICAL DATA

Including for the engine, gearbox and emissions

SUPPORTS THE PTIAdapter21

FSD.PTI21 uses the PTI-Adapter to communicate with the vehicle's control units, thereby improving the efficiency of a wide range of tests, such as installation tests and braking efficiency tests. The sensors inside the PTI-Adapter can also be used to measure dynamic parameters such as deceleration.
